

# Evidence Bags

## Alert Continuous Security™

### The Ultimate in Security Tracking

- The serial number of each Alert Security Bag is maintained and dispensed in numerical order.
- Easy tracking of successive transactions.
- Prevents unauthorised substitution of bags.
- Creates a “tight” security atmosphere.
- Easy to store and dispense.

## TAMPER EVIDENT TAPE SYSTEMS the HEART of the Evidence Bag.

The **Alert™** Security Seal closure is designed and engineered to be . . . Simply the Best. This adhesive closure system offers maximum security protection with multiple tampering indicators.

The **Alert™** Security Seal closure combines a high strength adhesive with visual indications of tampering:

- ✓ Colour change
- ✓ The words “ALERT VOID” appear
- ✓ The serrated edges of the tape fragment at the point of tampering

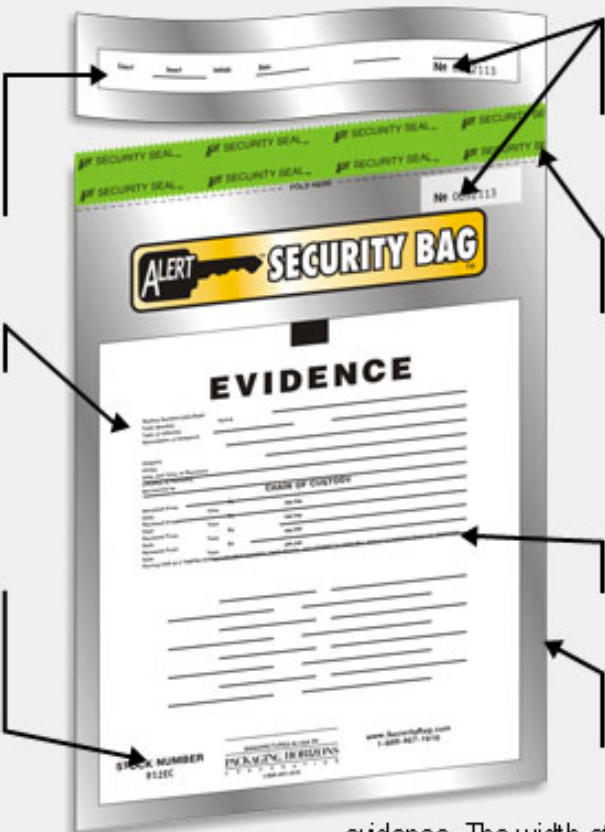

*Tampering triggers the hidden message -  
ALERT VOID.*

# Evidence Bags

## Single Compartment Evidence Bag

**Tear-off Receipt:** An essential element in tracking and tracing. The receipt provides a "write-on" area for recording pertinent information about the contents and a designated signature block for recording the identity of the preparer - complete accountability.

**Dual Serial Numbers for Tracking:** Located on both the tear-off receipt and the body of the security bag, these numbers provide a tracking method from the sender to the final receiver - even with multiple transfers through an armored car system.

**Easy to Use Instructions:** Help the user to prepare and seal the security bag properly.

**Tamper Evident Tape Closure:** - Maximum Security Tamper Evident Void Tape

**Heavy Gauge, Multi Layer Polyethylene Bag Construction:** Alert Security Bags are manufactured from a 3 mil (75 micron) high strength three layer polyethylene film. The three (3) layer construction combines a tough puncture resistant outer shell with a high strength inner sealing surface.

**Write-On Information Block:** Prompts the user with vital information categories.

**Security Bag Seals:** Wide in-set seals are used for the highest level of tamper evidence. The width of the seal yields a high strength film bond and the in-set position gives a very positive indication of possible tampering - far more security than thin edge seals.

### Product Information:

- PHC69EC – Evidence Bags (small) 6x9”/ roll of 100
- PHC912EC – Evidence Bags (medium) 9x12” (A4)/ roll of 250
- PHC1520EC- Evidence Bags (large) 15x20” /roll of 250
